

Rotosolver® Mixer Trial Skid

With Explosion Proof Motor for Chemical Applications

Try the Rotosolver® High Shear Industrial Mixer at your Plant

Our Rotosolver dispersion technology employs high shear and pumping of up to 3 times that of conventional dispersion blades. The result is more effective dispersions and emulsions for a more uniform product and streamlined production.

2-Week Rotosolver Trial for your Chemical Mixing Applications

A Trial gives you the opportunity to try the Rotosolver using your own materials and with your own operators / R&D team running the equipment. We encourage you to compare it to your current disperser, noting how the Rotosolver performs in terms of overall mixing time, flow, energy reliance, and efficiency with your current processes. We are confident you'll find that it outperforms in critical categories and provides:

- An optimal balance between shear and flow
- Excellent product flow patterns and turnover in the tank
- Greatly reduced mixing times
- Lower heat input
- Lower power consumption
- Superior mixing and dispersing
- 100% dissolving, hydrating, and suspension
- Single shaft, obstruction-free design
- One piece, clean-in-place (CIP) mixing head
- All stainless mixing head, shaft, drive, and motor available
- Optional secondary foils
- Quality scalable from lab to production

Pictured without the removeable front access panels.

Everything You Need to Start Your Trial:

The Rotosolver trial mixer is fully enclosed on a "Skid" with removeable front panels for easy access to the mixer, tank, and electrical panel, etc. Fork-lift pockets are mounted at the bottom of the skid for transporting it around your plant. The skid contains:

- Rotosolver high shear mixer, model 132RS88-SS, 15HP explosion proof motor
- 100-gallon stainless steel tank (not jacketed) with a bottom discharge valve
- Industrial VFD Controller, Class 1 Division 1, enclosure ready to be wired to your electrical source
- Analog AMP and Hz Readouts
- Operating Instructions and Equipment Manual

Schedule Your Trial Today!

Contact Shawnacy McManus
Chemical Market Sales Manager

Tel: 610-301-3355

Standard trial periods are 14-days from receipt to return shipment. Unit should be fully cleaned and assembled prior to returning. We will provide you with return labels.

Admix Support

Our Sales Engineers, Chemical Market Manager, an/or Manufacturer Representatives, will be available to assist you with your Rotosolver Trial.
